This Action is responsive to the communication filed September 19, 2007.

Claims 3, 5, 8-10, 13, 15, 17-24, and 29 have been cancelled.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1,2,4,6,7,11,12,14,16,25-28,30 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Waldrum '065.

The recitation of "cleaning" merely relates to intended use and is given no weight. Waldrum shows a plurality of nozzles 18, an inlet 34, outlets 60 and valve member 48 for influencing flow to the outlets. The pressure of Waldrum can be read as a "low" pressure.

Applicant's arguments have been fully considered but they are not persuasive. It is inherent that different inlet pressures will result in different positions of valve 48 since the spring force is a constant. At one of those positions valve 48 will determine flow through the combination of the first and second paths, which meets the functional language of the claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
